

IT Employment Continues to Struggle to Gain Traction Ticking Down in August

IT employment again struggled to gain traction in August, ticking down 0.05%, or a loss of 2,400 jobs, month-over-month, according to TechServe Alliance, the national trade association for the IT & Engineering Staffing and Solutions Industry. On a yearly basis, the IT job market contracted by 0.33%, with a loss of 17,500 positions. Employment in Engineering was up 1.06% in a year-over-year comparison, adding 29,800 jobs during the same period.

“As the overall job market softened in August, IT employment continued to struggle to gain momentum,” said Mark Roberts, TechServe's CEO. “Throughout 2024, job growth in IT has been effectively flat after 23 consecutive months of job losses. I continue to see IT employment

moving sideways until the fog of uncertainty lifts over the economy, the national election, and ongoing geopolitical turbulence.”

"Long-term, the demand for IT professionals will continue to outstrip supply and IT staffing companies prepared to respond to demand as the market recovers will be most likely to succeed and build enterprise value," Roberts concluded.

The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT and engineering professionals.

Technical note: TechServe Alliance's IT Employment Index and Engineering Employment Index are the first specific measurements of IT and engineering employment. These unique measurements of total IT and engineering employment are created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 22 industries and industry sectors employing significant numbers of IT workers and nearly two dozen engineering occupations in 30 select industries and industry sectors employing significant numbers of engineering workers. Both the monthly IT Employment and Engineering Employment Indices are based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and is revised accordingly. Both indices are also subject to periodic revisions and annual revisions / benchmarking that includes revisions to several years of employment data, which also may incorporate new occupational definitions. Both indices were revised / benchmarked going back several years released on February 2, 2024. In addition, both indices are subject to minor revisions to March and April data of this year. The next major revision will be released and published in February 2025.
